ABSTRACT

Types of degrees offered by Arkansas colleges and universities are described, and information on degrees conferred and output trends are examined. Data are presented from 1972-73 through 1979-80. In this time period, public institutions had overall increases of 15.3 percent in the number of degrees awarded, with the greater percentage of increase occurring for associate degrees. For public institutions, the number of bachelor's and doctoral degrees declined between 1972-73 and 1979-80. For the 1972-73 to 1979-80 time period, private institutions experienced an overall increase of 6 percent in numbers of degrees granted with increases in certificates, bachelor's, and master's degrees, while the numbers of associate degrees awarded decreased. Information on degrees granted by subject field for 1973-74 through 1979-80 indicates the following: at the undergraduate level, the increases for all institutions combined were greatest in the fields of business and management, education, and health sciences, while the decreases were greatest in letters, communication, and social sciences. At the graduate level, the increases were greatest in business and management, education, engineering, health professions, and psychology, while the decreases were greatest in biological sciences and social sciences. Information on enrollment by major area of study is presented for fall 1980, when it was first reported. (SW)

DEGREES GRANTED AND PROGRAM PRODUCTION BY ARKANSAS INSTITUIONS OF HIGHER EDUCATION

REPORT 80-3

JOANNE BRANSCUM
Research Analyst

April, 1981

FOREWORD

This report is a prototype of a series of reports which will be published each year by the Arkansas Department of Higher Education. These reports are based on data collected through the Arkansas Higher Education Information System (AHEIS) developed over the past eighteen months. That system is now a model for other states as one which strikes the appropriate balance between comprehensiveness and the danger of "over-reporting."

Degrees awarded are one basic measure of output of educational institutions. They are not the best measure, as what our colleges really produce is education and not all education culminates in a degree award. However, these data do document the achievement of students, and the trends in those achievements. The data for this report comes primarily from the reports of enrollments by program in the 10 series of the AHEIS and the reports of degrees granted in the federal Higher Education General Information Survey.

As with any first effort, the first of each of these reports is likely to be flawed, especially by errors of ommission of potentially useful analyses. Yet these first reports are non-the-less useful, not only to the State Board and Department of Higher Education, but also to the institutions and others concerned with the future of higher education in Arkansas.

We are grateful for the assistance of those persons who served on the information system task force who have made this new information system as effective as we find it to be. Special thanks must go to all those institutional officials, too numerous to list, who actually fill out the forms, providing the data in such a conscientious manner. Joanne Branscum has done a really fine job on this report, ably assisted by her supervisor, Dr. Tom Spencer. Wanda Cockrell and the production unit staff have again generated an attractive and comprehensible document. To all of these we express our gratitude and acknowledge our debt, but it is the Arkansas Department of Higher Education which must accept ultimate responsibility for the contents of the report, including any errors contained therein.

EXECUTIVE SUMMARY

This analytical report is based on data reported in the Arkansas Higher Education Information System by Arkansas colleges and universities as well as reports submitted to the National Center for Educational Statistics and it will be produced annually. The report opens with a brief history of collegiate degrees in Arkansas and discussions of each of the types of degrees currently awarded in Arkansas.

A comparison of degrees granted in 1979-80 with the previous year indicates that the total number of degrees granted have increased in both the public and independent sectors. In the public sector increases were experienced at the associate, bachelor's, master's, doctoral, and first professional levels and the only level experiencing a decline between the two years was certificates. For the independent sector, increases were experienced in bachelor's and master's degrees and decreases were experienced in the numbers of certificates and associate degrees awarded.

Data is presented from 1972-73, the first year for which complete degrees granted data is available, through 1979-80. In this time period, public institutions had overall increases of 15.3% in the number of degrees awarded with the greatest percentage of increase coming in associate degrees. The 168% increase in associate degrees granted by public institutions is attributed to the increase of six two-year institutions during this period as well as increases in numbers of associate degrees granted by existing two- and four-year institutions. For public institutions, the numbers of bachelor's and doctoral degrees declined between 1972-73 and 1979-80. In the 1972-73 to 1979-80 time period, independent institutions experienced an overall increase of 6% in numbers of degrees granted with increases in certificates, bachelor's, and master's degrees while there were decreases in the number of associate degrees awarded. Thus, in this seven year time span, the associate degrees moved from 8% of the total degrees awarded to 15%, the master's degrees awarded increased from 14 to 16% of the total and the bachelor's degrees awarded declined from 73% to 63% of the total.

The report presents degrees granted by subject field for all Arkansas institutions from 1973-74 through 1979-80. At the undergraduate level, the increases for all institutions combined were greatest in the fields of business and management, education, and health sciences while the decreases were greatest in letters, communication, and social sciences. At the graduate level the increases were greatest in business and management, education, engineering, health professions, and psychology, while the decreases were greatest in biological sciences and social sciences.

The report displays enrollment by major area of study which was reported for the first time in the fall of 1980.

DEGREES GRANTED AND PROGRAM PRODUCTION BY ARKANSAS INSTITUTIONS OF HIGHER EDUCATION 1979-80

HISTORY OF COLLEGIATE DEGREES IN ARKANSAS

Higher education in Arkansas, as in most of the rest of the nation, began in the independent sector. In the years before the Civil War, several attempts were made, primarily by church groups, to establish colleges in Arkansas, but few were able to survive for long. Only one institution which exists today can claim ties with a pre-Civil War college. Cane Hill College, founded in 1834 by the Cumberland Presbyterians, was the parent institution of what is now The College of the Ozarks (CO) in Clarksville. There are now nine four-year and three two-year independent institutions in Arkansas. These institutions awarded a total of 1,686 collegiate degrees in 1979-80.

Public higher education in Arkansas began in 1871 with the establishment at Fayetteville of Arkansas Industrial University which later became the University of Arkansas (UAF), the state's first land grant institution. The first baccalaureate degrees from the institution were awarded in 1876. Since 1871, 18 additional state supported institutions have been established. Included in that number are one medical sciences campus, seven four-year institutions, three branch campuses and six community colleges. Southern Arkansas University - El Dorado (SAUE) was the most recently established campus, beginning operation in 1975. In 1979-80 these publicly supported institutions awarded a total of 9,434 degrees at all levels.

TYPES OF DEGREES

A wide variety of academic degrees are awarded by higher education institutions in Arkansas. Some degree programs are specific to a career field and reference to this field generally becomes part of the title of the degree, e.g. Bachelor of Architecture, Bachelor of Music, Master of Business Administration, and Doctor of Education.

Commonly accepted definitions of the levels of degrees are as follows:

Certificate

Certificate programs are, for the most part, highly specialized career courses which are usually, though not universally, shorter than degree programs. They are occasionally geared for admission to licensure or career entrance tests, and they are far more common at two-year colleges than four-year colleges and universities.

Associate Degree

Among associate degrees, the associate in arts (A.A.), the associate in science (A.S.), and the associate in applied science (A.A.S.) are the most popular types.

> The associate in arts is designed for four-year college transfer and tends to be used more by two-year arts and sciences colleges and four-year institutions than the other two degrees. The associate in applied science is offered primarily in occupational/technical programs and is not usually a transfer degree. The associate in science is used equally in arts and sciences and professional/technical programs, but in arts and science programs it is more ofen awarded in the sciences than in the humanities. The A.S. is sometimes intended for transfer and sometimes not. (Levine, 1978, p.p. 163-164.)

Bachelor's Degree

A bachelor's degree is usually granted upon completion of an educational program requiring a minimum of four years of academic work.

The most common of the baccalaureate degrees are the bachelor of arts (B.A.) and the bachelor of science (B.S.). Ninety-nine percent of four-year arts and sciences colleges and 25% of four-year professional/technical colleges offer the bachelor of arts degree.

> No universal differences separate the two degrees. Both consist of general education, a major, electives, and sometimes basic skills components. The B.S. is likely to require more courses in the major than the B.A.; the B.S. is awarded significantly more often in the natural sciences than in the humanities; and the B.A. is used four times as often by arts and sciences colleges than professional/technical schools. Beyond this, differences depend on individual college policies, including (1) offering students a choice of degrees with no distinction between them; (2) requiring more advanced courses for the B.S.; (3) offering fewer electives in the B.S. program; (4) requiring a minor for the B.S.; (5) requiring a thesis or project for the B.S.; and (6) having different general education requirements for the B.S. degree. (Levine, 1978, p.p. 163.)

The bachelor in general studies, also called the bachelor of liberal arts or bachelor of liberal studies is another type of baccalaureate degree offered by a number of colleges. The general studies degree is characterized by a ceiling on the number of courses students may take in the area of concentration and, in some programs, by an emphasis on general education. Arkansas State University--Jonesboro (ASUJ) and the University

of Arkansas at Pine Bluff (UAPB) offer a bachelor in general studies.

First Professional Degree

The professional degree signifies the completion of the academic requirements for a selected profession. These programs usually require at least two academic years of previous college work and require a total of at least six years of academic work for completion. First professional degrees conferred in Arkansas are in law and human medicine.

Master's Degree

A master's degree is any earned academic degree carrying the title of Master. In liberal arts and sciences, the degree customarily is granted upon successful completion of one or two academic years of work beyond the bachelor's level. In professional fields, it is an advanced professional degree carrying the master's designation (e.g., LLM, MS (Master in Surgery or Master of Science), MSW (Master of Social Work)) earned after the undergraduate or first professional degree.

Doctoral Degree

The doctor's degree is the highest academic degree awarded in a given discipline or profession. It usually requires completion of three or more years of graduate work and completion of a special research study resulting in the publication of a dissertation. (Colorado, 1968, p.p. 4-5.)

A SUMMARY OF DEGREES CONFERRED AND OUTPUT TRENDS

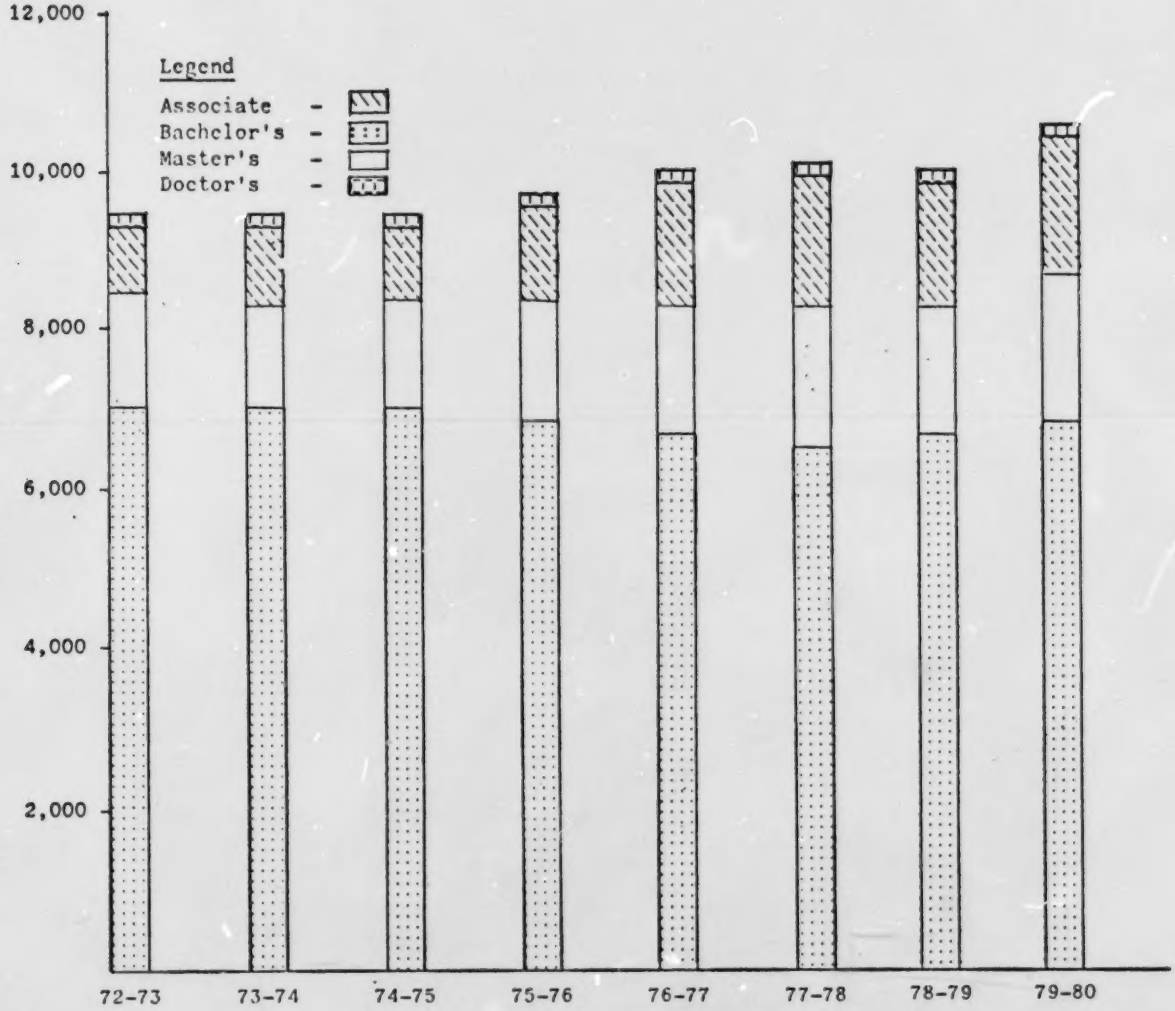
The total number of degrees awarded by Arkansas public institutions increased steadily from 1973 through 1980. Total degrees granted at independent institutions increased from 1972-73 through 1976-77. There were small declines in total degrees granted by independent institutions in 1977-78 and 1978-79 followed by an increase in 1979-80. The increase in part-time enrollment at private institutions may be a contributing factor to the fluctuations in degrees granted. Figure 1 shows the total number of degrees granted in Arkansas in the following areas: associate's, bachelor's, master's and doctor's.

Degrees granted by Arkansas Institutions from 1972-73 through 1979-80 are displayed in Table 1.

Undergraduate Degrees

The number of bachelor's degrees awarded at public institutions declined 11.2% from 1972-73 to 1977-78. In 1978-79 and 1979-80 the number of bachelor's degrees awarded increased 3.3% and 4.7% respectively.

FIGURE 1: DEGREES GRANTED AS A PROPORTION OF TOTAL DEGREES, ARKANSAS INSTITUTIONS, 1972-73 THROUGH 1979-80



This table excludes Certificates and First Professional Degrees. For the purposes of this graph, Associate, Bachelor's, Master's and Doctoral Degrees are constituted as 100% of degrees granted.

*Specialist degrees awarded were not available for some years and were therefore not included in this report.

Nationally, the number of bachelor's degrees awarded have fluctuated from a high of 945,776 degrees awarded in 1974 to a low of 919,549 degrees in 1977. It is predicted that the number of bachelor's degrees awarded will increase steadily until 1982 at which time degrees awarded should peak and begin a decline which will continue through 1987. (NCES, 1980, p.p. 128-129.) Degrees granted by level by institutions are displayed in Table 2.

Although the total number of bachelor's degrees awarded at public institutions declined from 1972-73 through 1977-78, this was not the case at all institutions. ASUJ and Arkansas Tech University (ATU) had major declines in 1976-77 only. The University of Arkansas at Little Rock (UALR) and the University of Arkansas for Medical Sciences (UAMS) have experienced fairly continuous growth.

UALR granted increasing numbers of bachelor's degrees from 1972-73 through 1976-77. In 1977-78 bachelor's degrees granted declined 12% over the previous year. Since 1977-78 bachelor's degrees granted have resumed their upward climb and are at an all time high at 598. This is an increase of 36% over 1972-73. Undergraduate FTE enrollment has followed the same trend as bachelor's degrees granted declining only in 1977-78. Headcount enrollment has risen continuously since 1969-70 at which time UALR became a state-supported institution. Because UALR is an urban university, a major portion of the students enrolled attend part-time. Since 1975, approximately 50% of enrollment has been part-time.

UAMS had a decline in the number of bachelor's degrees granted during 1977-78 only. The number of degrees granted excluding 1977-78 have increased steadily. Headcount enrollment has grown consistently from 1972-73 through 1979-80. Part-time enrollment as a percent of total headcount has remained around seven percent.

Four schools, Henderson State University (HSU), Southern Arkansas University--Magnolia (SAUM), University of Arkansas--fayetteville (UAF), and UAPB, granted decreasing numbers of bachelor's degrees from 1972-73 to 1977-78.

Enrollment at HSU except for 1975-76, declined steadily from 1972-73 to 1977-78. Also, during this same time period, part-time enrollment as a percent of total headcount, increased.

At UAF enrollment declined from 1972-73 to 1975-76. In 1975-76 and 1976-77 enrollment increased. UAF has continued to have an increase in enrollment since 1976-77. The number of people enrolled part-time has remained relatively stable at 19%. Full-time equivalent enrollment at UAF declined only slightly during this time period. Personal interviews and further analysis have revealed no apparent cause for the decline in degrees granted from 1972-73 to 1977-78.

The number of bachelor's degrees granted at SAUM declined from 1972-73 to 1976-77. In 1976-77, bachelor's degrees granted increased to 236 which was an increase of 8.3% over 1975-76. Bachelor's degrees granted have remained around 230 since that time. Headcount enrollment at SAUM declined from 1968-69 to 1975-76 at which time enrollment experienced an

*See Table 5 in the Appendix for abbreviations.

upswing. Part-time enrollment at SAUM has shown no definite trend, fluctuating from 15% in 1975-76 to 18% in 1976-77 and then back to 15% in 1980-81. Also, full-time equivalent enrollment has varied considerably from 1972-73 through 1979-80.

The decline in degrees awarded at UAPB closely resembles the decline at SAUM. Degrees declined from 1972-73 to 1976-77 and in 1976-77 increased 11.9% over the previous year. A decline occurred again in 1977-78. However, bachelor's degrees granted increased 19% from 1977-78 to 1978-79. Enrollment at UAPB declined from 1968-69 through 1974-75. Enrollment increased from 1975-76 through 1977-78. Full-time equivalent enrollment has increased continuously from 1972-73 to 1978-79. Part-time enrollment has increased from 2.4%, fall, 1975 to 16.6%, fall, 1980.

The University of Arkansas at Monticello (UAM) granted approximately 270 degrees per year until 1976-77. Since that time the average has been 220 degrees per year. Both headcount and FTE enrollment have had no consistent drop or increase since 1973-74. Full-time equivalent enrollment has averaged around 1,700, usually not deviating more than 50 FTE in either direction.

Bachelor's degrees granted at independent institutions remained relatively more stable than in the public sector. Philander Smith college (PSC) is the only private institution that has had declining numbers of degrees granted since 1974-75. PSC had declining enrollment in 1975, increasing enrollment in 1976, 1977, and 1978 and a recurring decline in 1979 and 1980. Harding University (HU) and Ouachita Baptist University (OBU) have granted increasing numbers of bachelor's degrees with the exception of one year. HU administration attributes a portion of this growth to national recognition of a HU business team that has been competing with other universitites in the United States during the past five years. Degrees granted at HU declined during 1978-79. OBU experienced a decline in 1977-78.

While the total number of bachelor's degrees awarded at Arkansas institutions generally decreased during the 70's, the number of associate degrees awarded increased dramatically. The number of associate degrees awarded grew from 770 in 1972-73 to 1,731 in 1979-80. This was an increase of 125%. This growth can be chiefly attributed to the establishment of several two-year institutions in the state. East Arkansas Community College (EACC), Garland County Community College (GCCC), and North Arkansas Community College (NACC) began operation in 1973. In 1974, Mississippi County Commmunity College (MCCC) was established. SAUE began operation and Southern Arkansas University, Technical Branch (SAUT) became a state supported instituion in 1975. The number of associate degrees awarded at four-year institutions alone increased 116% from 1973 to 1980. This reflects the national trend of growth in associate degrees awarded. Nationally, associate degrees' conferred by institutions of higher eduction rose from 317,008 in 1972-73 to 412,246 in 1977-78. (NCES. 1980, pp. 20-21.)

Among the public four-year institutions, UAF and UALR have had the largest increase in associate degrees awarded, increasing approximately 50% since 1973-74.

Although the number of associate degrees granted at public institutions increased, independent institutions have generally experienced a decline. Over 90% of the associate degrees granted at independent institutions have been granted at Central Baptist College (CBC), John Brown University (JBU), Crowley's Ridge College (CRC), Shorter College (SC) and Southern Baptist College (SBC). CRC has had the most drastic decline in associate degrees granted, going from 69 degrees in 1972-73 to 17 in 1979-80. CRC has also had a significant decline in enrollment. CBC and SC have also had declines in the number of associate degrees awarded. However, enrollment at CBC and SC has not declined but has remained stable. JBU has had an increase in the number of associate degrees awarded, rising from 9 in 1973-74 to 23 in 1978-79. Enrollment at JBU has also increased steadly since 1974. Arkansas Baptist College (ABC), Arkansas College (AC), CO, HU, Hendrix College (HC), OBU and PSC granted a combined total of 21 associate degrees since 1973-74. Over 90% of the degrees granted at these institutions are at the baccalaureate level.

GRADUATE DEGREES

Statewide, the number of master's degrees awarded have fluctuated somewhat from 1972-73 to 1979-80. Master's degrees granted declined by 3% from 1973-74 to 1974-75. Master's degrees experienced a growth of 31% from 1,362 in 1974-75 to 1,788 in 1977-78. Between 1977-78 and 1978-79, however, a decrease of 7.6% occurred. The number of degrees awarded resumed its upward trend in 1979-80 with an increase of 6.2%.

Among the public instituitons, UALR and UAF have experienced the largest increase in Master's degrees granted since 1972-73, increasing 39% and 76% respectively.

Three areas, business and management, education, and engineering, can account for the growth in master's degrees awarded. Public institutions granted 105 business and management degrees in 1973-74. In 1979-80, this number had grown to 160. In 1973-74, 621 master's in education were awarded, 836 were awarded in 1979-80. Engineering had the largest percentage gain. increasing 231% from 41 degrees in 1973-74 to 136 in 1979-80.

OBU and HU are the independent institutions that have been granting master's degrees. Central Baptist college has recently began offerind a Master's in Theology. The number of masters degrees conferred at independent institutions since 1972 has remained relatively stable. Fifty-four master's degrees were conferred in 1972-73 and 67 in 1979-80. Over 90% of the degrees awarded at independent institutions were awarded in education.

Doctoral degrees have never been awarded in large numbers in Arkansas. Degree data show no consistent trends throughout the period under consideration. The number of doctor's degrees awarded peaked in 1973-74 at 119 and declined slightly each year therafter until 1977-78. The number of degree's awarded in 1977-78, 1978-79 and 1979-80 were 110, 94 and 102 respectively. UAF is the primary doctoral degree granting

institution in the state. However, UAMS and the University of Arkansas--Graduate Institute of Technology campus (UAGIT) grant a limited number of doctoral degrees.

The first professional degree category includes Doctor of Medicine and Juris Doctorate. Table 3 lists the number of first professional degrees granted from 1972-73 to 1979-80.

TABLE 3: FIRST PROFESSIONAL DEGREES CONFERRED
1972-73 THORUGH 1979-80

	72-73	73-74	74-75	75-76
Law	181	192	158	175
Medicine	99	105	105	120
Total	280	297	263	295
	76-77	77-78	78-79	79-80
Law	197	226	215	224
Medicine	118	122	126	121
Total	315	348	341	345

In summary, the total number of degrees granted in Arkansas, with the exception of 1978-79, increased steadily in number. Certificates experienced tremendous growth from 1972-73 through 1976-77, then declined in 1977-78, resumed growth in 1978-79, and finally declined 50% over the previous year in 1979-80. From 1973-74 to 1979-80 associate degrees experienced the greatest amount of growth with an increase of 122% from 1972-73 to 1979-80. The number of bachelor's degrees granted decreased 3% from 1972-73 to 1979-80. Master's and First Professional degrees granted in 1979-80, increased 30.5% and 23.2% respectively over 1972-73. The number of Doctor's degrees awarded decreased 12.8% from 117 in 1972-73 to 102 in 1979-80.

CHANGES IN TYPES OF DEGREES GRANTED AS A PERCENT OF TOTAL DEGREES

Changes have occurred in the types of degrees conferred by the institutions in the state from 1972-73 through 1979-80. Degrees granted by type as a percent of total degrees from 1972-73 through 1979-80 are displayed in Table 4. The number of certificates granted as a percent of total degrees granted increased steadily from 1972-73 through 1976-77. In 1976-77, of the total number of degrees granted, certificates peaked at four percent. Thereafter, the percent of certificates granted declined reaching a level of two percent in 1979-80.

From 1972-73 through 1977-78, the percent of degrees awarded as associate degrees rose steadily to reach a record high of 15%. Associate degrees dropped to 14% in 1978-79 but returned to 15% in 1979-80.

Bachelor's degrees declined sharply from 73% of total degrees granted in 1972-73 to a low of 61% in 1977-78. In 1978-79 and 1979-80 the percent of degrees awarded as bachelor's degrees rose to 62% and 63% respectively.

Fourteen percent of degrees granted in 1972-73 were masters degrees. This percentage rose to a high of 17% in 1977-78. Master's degrees dropped to a level of 16% in 1978-79 and remained there in 1979-80.

TABLE 4: DEGREES GRANTED BY TYPE AS A PERCENT OF TOTAL DEGREES 1972-73 THROUGH 1979-80

DEGREES GRANTED	72-73	73-74	74-75	75-76	76-77	77-78	78-79	79-80

TOTAL	100	100	100	100	100	100	100	100

*Specialist degrees awarded were not available for some years and were therefore not included in this report.

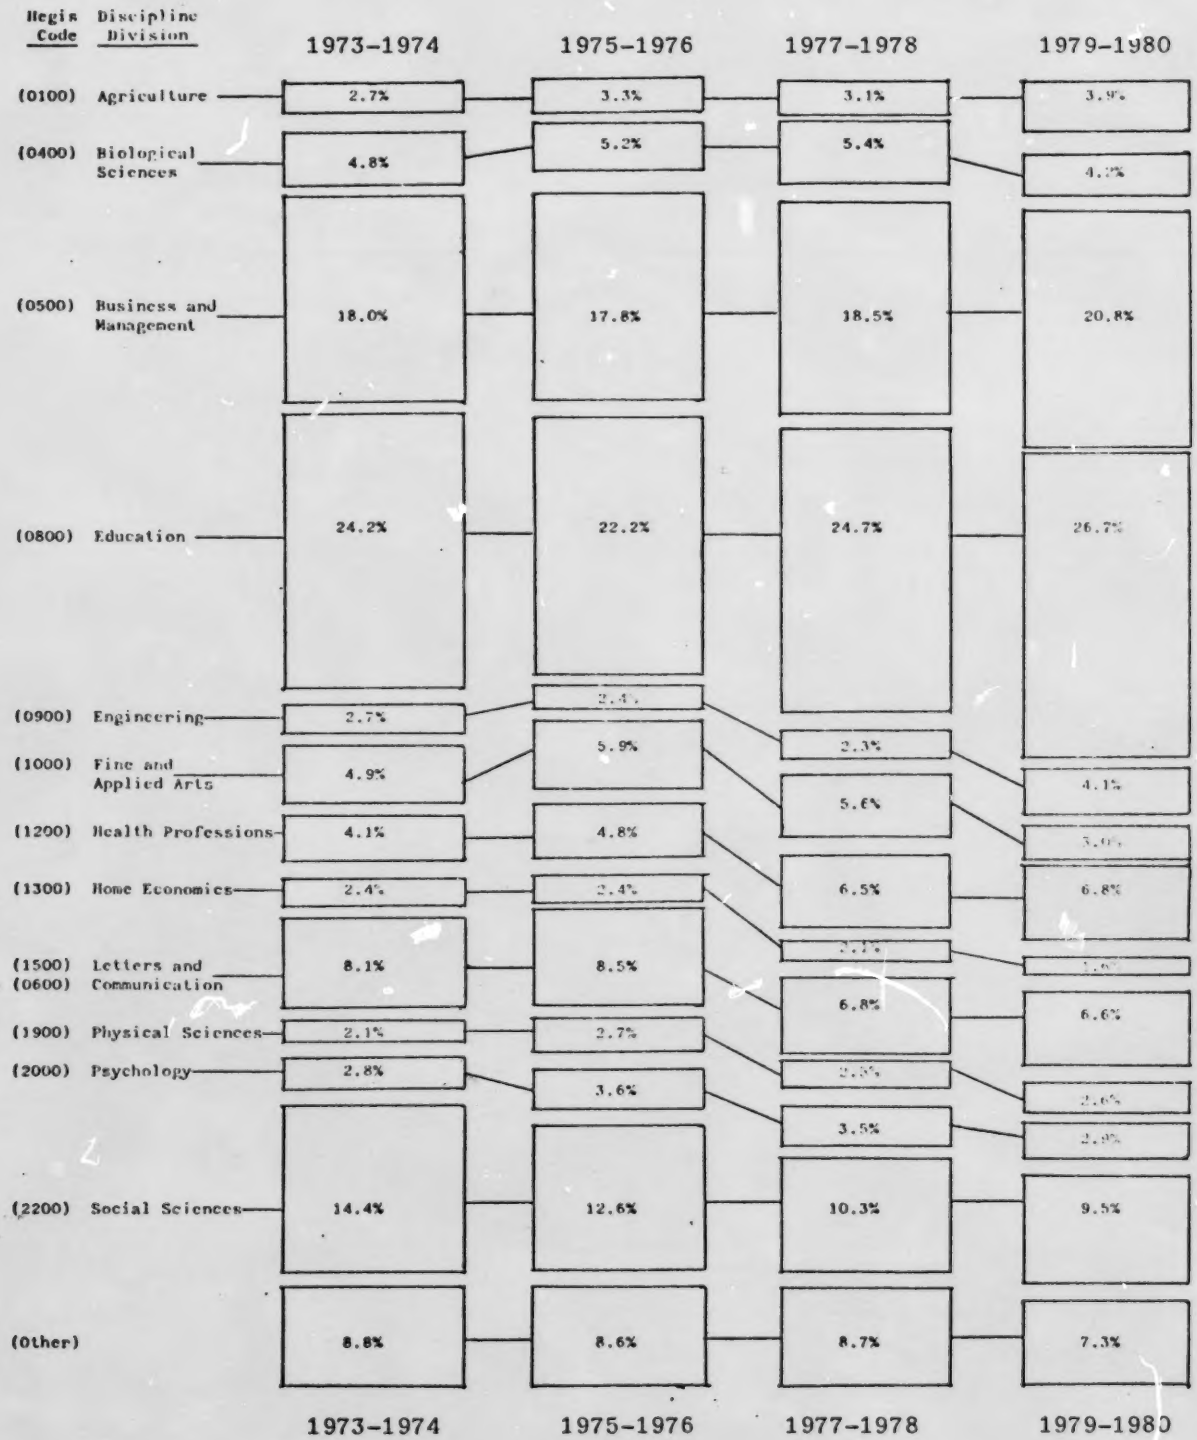
The percent of degrees granted as First Professional degrees and Doctor's degrees has remained steady during the time period under consideration, with doctor's degrees at one percent and first professional degrees at three percent.

TOTAL DEGREES CONFERRED IN ARKANSAS

UNDERGRADUATE

Of the bachelor's degrees granted in 1973-74, 24.2% were granted in education. (See Figure 2.) The percent of degrees granted in education has continued to increase and is now at 26.7%. Business is the second largest degree granting area. Approximately 20% of all bachelor's degrees granted in 1979-80 were in business. Health professions has also increased its share of degrees granted, going from 4.1% in 1973-74 to 6.8% in 1979-80. Social sciences experienced the greatest decline from 14.4% of bachelor's degrees granted in 1973-1974 to 9.5% in 1979-80.

FIGURE 2: BACCALAUREATE DEGREES CONFERRED BY SUBJECT FIELD AS A PERCENTAGE OF TOTAL BACCALAUREATE DEGREES CONFERRED IN ARKANSAS



GRADUATE

Of the master's and doctoral degrees granted the area granting the largest percentage of degrees was education. (See Figure 3.) In 1973-74, 47.5% of the graduate degrees granted were in education. This level has remained relatively stable from 1973-74 to 1979-80. Because of the increased number of Master's degrees being offered at Higher Education Institutions during the last eight years, there have been great shifts in the the degrees conferred by subject field as a percentage of total degrees conferred in Arkansas. For example, in 1973-74, .9% of total degrees conferred were conferred in psychology. In 1979-80, this percentage increased to 5.2%. This increase can be attributed to the initation of a master's degree in rehabilitation counseling at the University of Central Arkansas (UCA) in 1975 that graduated 59 people in 1979-80. Business and management also experienced growth because of the implementation of a Master's in Business Administration at UALR that graduated 29 people in 1979-80. Biological sciences had the greatest percentage decline decreasing from 11.0% in 1973-74 to 2.7% in 1979-80, while psychology increased the greatest amount from .8% in 1973-74 to 5.2% in 1979-80.

The number of degrees granted by each Arkansas institution are shown by subject field in the appendix.

ENROLLMENT BY MAJOR FIELD OF STUDY

Enrollments by major fields of study are reported by each Arkansas higher education instituion. This information is listed by institution in the Appendix.

UNDERGRADUATE

Figure 4 shows a comparison of baccalaureate degrees conferred by subject field as a percentage of total baccalaureate degrees conferred in Arkansas in 1979-80 and upper division undergraduate enrollment by major area of study at Arkansas four-year institutions for fall, 1980. The most significant areas of change at the undergraduate level were business and management, education, and social sciences.

In 1979-80, 20.8% of undergraduate degrees granted were in business and management. This fall, 22.8% of upper division students declared majors in business and management. Because fall, 1979, enrollment by major field of study information is not available; no direct comparison between declared majors last year and this year can be made.

Approximately 27% of degrees granted in 1979-80 were in education. Twenty-Two percent of upper division enrollees declared a major in education in the fall of 1980. Social sciences also appears to be undergoing a change. In 1979-80, 9.5% of degrees granted were in social science: fall, 1980, declared majors in social sciences were at 6.4%.

GRADUATE

Figure 5 shows a comparison of degrees conferred by subject field as a percentage of total degrees conferred in Arkansas in master's and doctoral programs and graduate enrollment by major field of study at Arkansas four-year instituions, fall, 1980.

Because of the introduction of new master's degree programs at various instituions, major changes seem to be occurring in almost every area. One apparent difference worth noting is the change in education. In 1979-80, 50% of masters and doctoral degrees granted were in education. In the fall of 1980, only 30% of graduate enrollment by major field of study was in education.

With the increased compilation of data by major field of study in future years, more direct comparison will be possible.
